ABSTRACT

The vehicle industry will stay an important occupation in the secondary industry that occupies more GDP (gross domestic product) allocation recently with promoting its electric vehicle into our deep level and helping us with its functional AI chip to one. Therefore, the new innovative reformation may be demanded by the modern society requiring amount and quality & functions like security chip for the sake of avoiding the crash accident as soon as possible even zero accident. We should arrange more departments in university and R & D Dept in maker so as to enhance its low-cost and multi-functions device for that secure problem and price declination. On the other side, the more diversity requirement from end-customer who may ride the auto in a busy route may be demanded ultimately. Therefore, the more researcher and study staffs can be recruited and adopted for them to continually clarify and classify those complicated technology into simpler ones in order to produce more smart product and equipment for our user. We could transform the key joints into the actual sample and even launch one later from university and institutes that our maker creates new one from childish stage to mature one step by step. Not only educating our new engineer and scientists but also recruiting mature experts from out-resource makers and even colleges. So that the latent and technology might create a new good-circulation contributed to the maker making level & quality eventually and ultimately. We should develop not only engineers in maker internally but also cultivate the basic experiment and non-derivative one as well for progressing our making speed and amount with low-cost and high-level & high-efficiency contributed to

the more satisfaction from basic demands too in the ultimate view. We should maintain the continual innovation products for avoiding knock-out at all and transforming series derivative products to occupy the instructive market level and capacity. Thereby, the basic besides applied one will be proceeded simultaneously due to experiencing the double-times effort from basis to advance course definitely for owning leadership relation in product making aspect. In short, the auto business as a significant influence might wield its serious role in enhancing GDP value and all kinds of auto series with autonomous driving function for ensuring the drivers and accompanies life and declining damage at all. At the end, the scientist must go on his research constantly not giving up and publish related papers with high-quality in high-impact journal for lasting his research in defined fields after estimating theoretic & experimental course with fully innovative method and calculation modeling capacity sustainably.

Keywords: Progressing high-technique product & GDP systems, estimation; auto making, by sustainability, an innovated searching.

1. Introduction

The potential talents need to be emphasized and trained a periodical education experience so as to raise the competition capacity each other that will take up the usefulness methods to be birthed constantly. The collaborative combination and cooperative spirit will be advocated by us so as to make an innovative item like software program making capacity besides hardware searching and exploration. From the composition to the performance the series experimental with a series of processing stages like combining compositions, processing, evaluating, processing again, evaluating longevity & making product and brain judgment like modeling erection with principle formula will indicate that first one factor to determine the predicting performance result and longevity. So we should investigate broadly and clarify the key points and then start our theoretical modeling exhibition with the help of experimental proof that may bring out many chances for us to process continually.

Meantime, the investment behavior may be proceed by the similar method with experiment and judgment capacity. The first experiment will be done from several thousand stocks in exchange center use portfolio combining strategic plan and then after some time the evaluating its earning will be expressed, and the goodness with AI investment machine and mathematical deduction modeling to analyse the price changes even vibration. Thereby, the financial innovation will make us to be a rich-man that contributes to the tertiary industry enhancement eventually and ultimately. Hence, the reformation idea will occupy the first and important factor for us to master its behavior and judgment like financial one that may bring us more beneficial capital than ever because of the quantization investment and evaluating stock price within 5 thousand stocks. Thereby, the stocks evaluating system will be more prevalent and urgent for our constitution investment behavior. There are so many tips to

tell us following the main capital to win the game that is like a fairy tale story under the help of AI (artificial intelligence) machine.

At the same time, the nations industry advancement will influence our life level like 16° electric consumption per people per day in China 2025. the more energy electric generator has to be increased gradually year by year so as to raise our GDP value eventually besides giving us more comfortable even convenience above 10 times to catch up the USA developed level. Let us do best endeavour to raise our mission for improving GDP value under cooperation and collaboration spiritual courage within R &D dept(research &development department) and laboratory scope that is to become our diligent destination as to so many scientist and scholars. The better way to be successful is still made by ourselves in different occupations that may create huge power to push the high-technique forwards sustainably whilst the achievement can be published in a journal with fluently English narration once we had any spiritual inspirations. [1~26]

2. Discussions

The financial income monitors one region economy activity so that the value may reflect the GDP value in same year which influence our life level goodness degree. Therefore, the more that value means more our disposable capital that can use in the infrastructure and help the innovation companies with big number if they are fitting to the advantage condition like non-contaminated transformation enterprise and high-profitable ones with high-technique product making. Therefore, the more new subjects like multi-disciplinary one within Mathematics quantum computer &investment and Administration Artificial intelligence &Computer science and technology etc. will be emerged in future sustainably for our engineers to search for sustainably. Accounting for developing those new emerging interdisciplinary subjects there might be exhibiting new eco-friendly and humanoid ones more and more recently and in near future due to making those robots under the best performance according to simulating one with person profile. Therefore, the more research teams and laboratory would study related content for explaining more sophisticated and maturer robot that can work like human being forever in workshop restaurant business building &family etc. So that they might change the ultimate life conditions and styles in the end upon those man-like robots exhibition in front of public occasions that the automatic ones simulates us to transit some package and lunch etc. service replaced human.

2.1 Academic ranking of world universities in 2026

The Academic ranking of world universities in 2026 might show 39~43 score by Notherwest University, Evanston~New York University correspondingly according to the Figure 1 manifested the latter New York University strong academic strength.

Figure 1 Academic ranking of world top 26~31 universities in 2026. [1]

2.2 Passenger cars (narrow definition) retailed amount in Jan~Jul 2026 in China market

The Passenger cars (narrow definition) retailed & new energy sale amount in Jan~Jul 2026 in China analysis might show 1.5~1.45 million & 0.6~0.1 million accordingly by January~July 2026 correspondingly in 2026 according to Figure 1 exhibited in May strongest capacity trajectory to new energy vehicle. Meantime, the new energy penetrable rate value would indicate about 38%~55% by them respectively to manifest in July the most forwards developed pace exceeded in June with 63% whilst the average value maintained the y-y value with 55.5%. In addition, the four months for new energy retail like Jan, March, April & May with 0.6 million, 0.85 million, 0.85 million & 1 million accordingly exceeded the average value with 0.56 million. Moreover, the average passenger cars for narrow definition would afford 1.45 million that the new energy ones attained 38% occupations with Passenger cars.

Figure 2 Passenger cars (narrow definition) retailed sale amount in Jan~Jul 2026 in China. [2]

2.2 China top cities & Qatar GDP status

The China top cities & Qatar GDP status would show 2~1.8 billion dollars by Wuhan~Chengdu cities correspondingly in 1987 according to the Figure 4 manifested their forwards economic trajectory. On

the other hand, the y-y value might record 36%~34% by them accordingly to manifest the Wuhan city most forwards developed pace. In contrast, the Suzhou maintained 30% pace with downward speed.

Figure 3 China top cities & Qatar GDP status. [2]

Moreover, the China top cities & Qatar GDP status would show 6~1.5 billion dollars by Shanghai~Guangzhou cities correspondingly in 1984 according to the Figure 4 manifested the former Shanghai city forwards economic trajectory. On the other hand, the y-y value might record 13.5%~23% by them accordingly to manifest the Shanghai city most forwards developed pace. Meantime, the Qatar maintained -3.03% pace with minus speed.

Figure 4 China top cities & Qatar GDP status I. [2]

3. Conclusions

The vehicle industry will stay an important occupation in the secondary industry that occupies more GDP (gross domestic product) allocation recently with promoting its electric vehicle into our deep level and helping us with its functional AI chip to one. Therefore, the new innovative reformation may be demanded by the modern society requiring amount and quality & functions like security chip for the sake of avoiding the crash accident as soon as possible even zero accident. We should arrange more departments in university and R & D Dept in maker so as to enhance its low-cost and multi-

functions device for that secure problem and price declination. On the other side, the more diversity requirement from end-customer who may ride the auto in a busy route may be demanded ultimately. Therefore, the more researcher and study staffs can be recruited and adopted for them to continually clarify and classify those complicated technology into simpler ones in order to produce more smart product and equipment for our user. We could transform the key joints into the actual sample and even launch one later from university and institutes that our maker creates new one from childish stage to mature one step by step. Not only educating our new engineer and scientists but also recruiting mature experts from out-resource makers and even colleges. So that the latent and technology might create a new good-circulation contributed to the maker making level & quality eventually and ultimately. We should develop not only engineers in maker internally but also cultivate the basic experiment and non-derivative one as well for progressing our making speed and amount with low-cost and high-level & high-efficiency contributed to the more satisfaction from basic demands too in the ultimate view. We should maintain the continual innovation products for avoiding knock-out at all and transforming series derivative products to occupy the instructive market level and capacity. Thereby, the basic besides applied one will be proceeded simultaneously due to experiencing the double-times effort from basis to advance course definitely for owning leadership relation in product making aspect. In short, the auto business as a significant influence might wield its serious role in enhancing GDP value and all kinds of auto series with autonomous driving function for ensuring the drivers and accompanies life and declining damage at all. At the end, the scientist must go on his research constantly not giving up and publish related papers with high-quality in high-impact journal for lasting his research in defined fields after estimating theoretic & experimental course with fully innovative method and calculation modeling capacity sustainably.

Article Publication Details

This article is published in the [International Journal of Multidisciplinary Research and Bulletin](#), ISSN 3108-1428 (Online). In Volume 5 Issue 4 (July – Aug) 2026

The journal is published and managed by [IRPG](#).
