ABSTRACT

The cities' GDP will compare different ones for seeing the variation among the similar ones know how they would improve that one through analyzing the local situation and its surround cities and meantime learn the priority and better ones' experience from other excellent places as well. The better practice may produce the better achievement that may help us rapidly enhance its economy state through main aspects attainment to same level with other good one. So that the efforts must proceed from now on to propose five-years strategic planning even more than ten-years how the detailing transaction behavior would proceed alignment in actual one with detailing allocation by government constitution and think tank rapidly and priority preparation. After they pass the related members meeting the all of preferential items must regulate into those aimed company bringing out the high-technique industrial innovation that might form security high-profit &high-efficient industry dynamic to push the tertiary, secondary &primary ones positively. Meanwhile, the vehicle special new energy one will wield its strong power in secondary industry due to needing a lot of assembling the mechanical electric electronic decoration aspects that they may occupy many industrial supplies ultimately. So the vehicle industry can play an important role in the steel artificial intelligent program chemical &new materials etc. requirement from supplying maker in up-stream ones. Therefore, the synthesis materials and software will play importantly effectiveness in promoting GDP value and y-o-y growth value primarily as a pillar influence represented the key secondary one occupations. On the other hand, the new technique still demand many researcher and experts to continually search the details direction around the new energy vehicle including its rechargeable-battery performance to which the innovation product can be applied like subsidiary-driven software in order to secure driving in high-speed and complicated roads. There

would still many searching direction in supporting the new-energy-vehicle development basis and its research content like how to decline the contaminated fuel exhaust emissions that may influence human being health and climate change & public sanitation. So that as for improving atmosphere and clean air quality the new productivity must be advocated and used based on hydrogen fuel hydraulic power nuclear generation station etc. many aspects for us to positively search sustainably. As for developing agricultural automatic device like supplying water with suitable temperature and amount upon artificial intelligent management and advance agricultural machinery accelerating research and its applications to the actual occasions that it will accelerate the entire work efficiency & speed with electric power even hydrogen fuel with precision work efficiency and low fuel cost than traditional diesel machine.

1. INTRODUCTION

As for improving high-tech product, the new searching for promoting product performance will exhibit in front of us directly how the transformation may influence our future life can be anticipated. The more research on its behavior the more experience and achievement could be attained ultimately, so that the as many as possible scientist & engineers may form a new team to continuously proceed those direction know how the innovation one wield its defining task precisely by them, and publish their relative papers in Nature, Science & Cell etc. famous magazine continuously. Therefore, the more innovation development can be caught by us and apply those new techniques to product and its some parts in order to enhance our new function and more achievement, which afford the certain influence to change the old status sustainably. At the same time, those researches may be proven with the experimental and other calculative results that it knows how to acquire the proved ones and what that may influence the defined product. So that the new method will be created through multidisciplinary subjects and more department combination where it can be used in the correct part and how it wields its effectiveness in detail, which may afford us more sophisticated cause-result-relationship. Definitely, those new innovation method for proving a certain field product properties might be some difficult to understand, the experiment must be done in order to prove its corrected scope and applied accuracy and suitability.

That may provide us the new view method to see the different scenery from the external into internal world like from the machine working logicity to the materials molecular one chemistry

physics & medicine. With interdisciplinary subject those difficult matters might be resolved smoothly and find the reasonable property between them how they process their defined limitation to work with mechanism and reason in the entire view of two molecules. Therein, some scientists may proceed their researches with one~two destinations following those researchers for the sake of finding new phenomenon in his research direction at all like why those ones play their role in defined scope. That will provide wider scope and methods for seeking the suitable explanation for them and others to utilize those results and courses to create some top advanced technique in actuality. So the high-technique will play its role constantly on the defined scopes accounted for more advance product they may create in advance that it benefits to transforming current traditional one into innovation new ones. That may influence our live condition and levels differently due to owning multi-purposed function and new technology at all. We should sustainably develop those tip field technique from now on to future definitely and absolutely knowing how the technique will affect us detailing, badness or goodness specially in our healthy status in the end. At last those high-technique product can transmit to oversea continually through having its advantageous aspect how to benefit our health and security that would become the final destinations. [1~30]

2. Discussions

2.1 Shenzhen city & African top nations GDP analysis

The Shenzhen city & African top nations GDP analysis would show 152~29 billion dollars by South Africa~Shenzhen city accordingly in 1999 in light of Figure 1 manifest the former South Africa strong economy capacity. Meantime, the y-o-y growth value might exhibit 0~21% by them correspondingly recorded the latter Shenzhen rapidly developed pace.

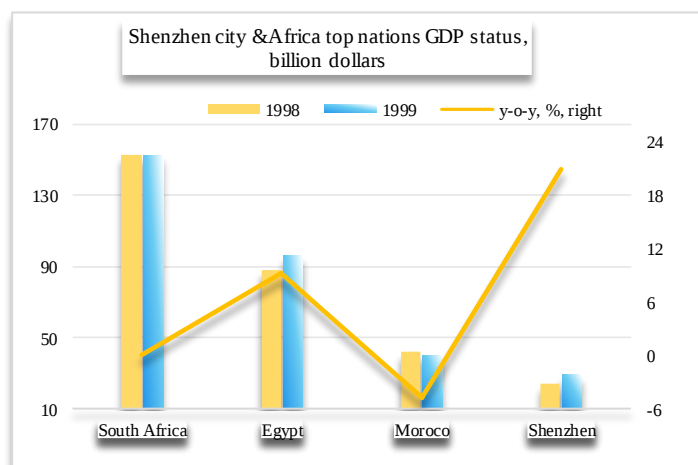

Figure 1 Shenzhen city & African top nations GDP analysis. [1]

Furthermore, the Shenzhen city & African top nations GDP analysis would show 147~5.2 billion dollars by South Africa~Shenzhen city accordingly in 1992 in light of Figure 2 manifested the former South Africa strong economy capacity. Meantime, the y-o-y growth value might exhibit 4~35% by them correspondingly recorded the latter Shenzhen most rapidly developed pace.

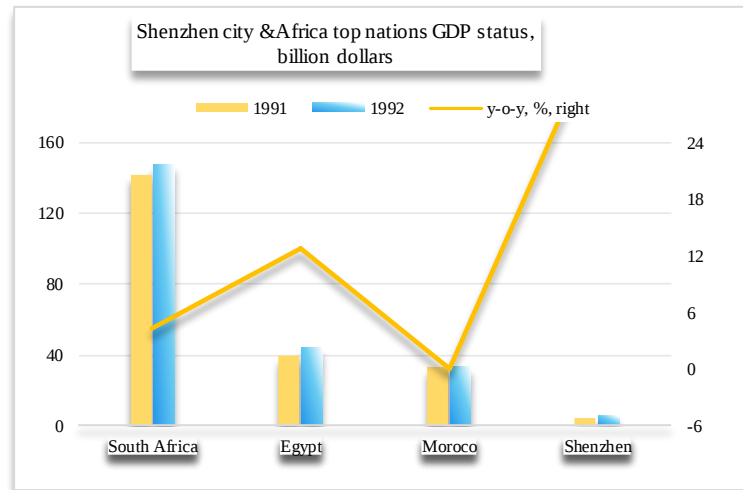

Figure 2 Shenzhen city & African top nations GDP analysis I. [1]

2.2 Belgium China vehicle analysis

The Belgium China vehicle analysis would show 1,001~227 by South BYD~Leapmotors accordingly in August 2026 in light of Figure 3 manifested the former BYD strong economy capacity. Meantime, the y-o-y growth value might exhibit 124~710% by them correspondingly recorded the latter Leapmotors most rapidly developed pace. In contrast, the MG remained the lowest 18% among them.

2.3 Introduction to Scholars International Journal of Chemistry and Material Sciences

As for the respected researcher & Doctor, we are excited to invite you to submit your research articles to the **Scholars International Journal of Chemistry and Material Sciences (SIJCMS)**. Our Journal publishes Original research articles, review article, Discussion papers, Viewpoints, Mini-reviews, Short communications, Book reviews, Essays within the whole field of Chemistry and Material Sciences and their related fields. We believe your contributions would add significant value to our publications. [3] Thereby, we are pleased to invite your submission to this journal dedicating to each sides, we will publish your precious paper in time with cheapness.

3. Conclusions

As for the high-technological product like vehicle the more important influence on our human-being will occupy more positions due to its transportation aspect from one place to another rapidly. Therefore, the activation research and development is to proceed continuously upon our scientist & scholars in college and manufacturer how the performance is to be promoted with recharging electric batteries driving power that may become an eminently high-light recently. Depended on the many agents in urbanization program in big city like Beijing Shanghai & Shenzhen city etc. the more ones can be sold than ever because its electricity fee is more cheapness than the traditional gasoline and diesel. Therein, the more vehicle with electric supply can be sold very good in urban cities that they may decline the contamination amount surrounding our neighborhood and atmosphere. Meanwhile, the rechargeable battery needs to be tolerating more cold environment in north area through experimenting different composition procedure course evaluation etc. parameters variation for developing cold new one to shorten the enduring time in north regions. If there will be better achievement the researcher and experts must publish their research paper in advancement journal to advocate the experiment content and results for the sake of increasing the related research performance whether or not it adapts the current problem. Hence, little by little the relative research cause may push the business forwards by our researcher and senior engineer in the view of adopting different parameters and its effectiveness to the actual cost and launch criteria. Maybe after ten years the many high-technique skills and products probably can be applied to the recent defect state so that the more adaption new technologies may be completed under a certain degree. The sustainable searching for improving matters in front of us will be proceeded continually through wielding the scientist expert scholar etc. advanced members effectiveness and influence on definitely and absolutely.

On the other side, the vehicle must be traded overseas for the sake of improving our emerging power specially in renewable energy ones, that may occupy more opportunities than domestic solo market that can bring up eminent wealthy and capital for us to reverse and continual research project with research & development department in university and manufacturer evidently. After the high-technique product complete the correspondingly trading transaction it needs to be proceeded with neighbor country and remote continent one simultaneously so as to enhance the entire nation's foreign exportation in addition importation amount and kinds specially those high-profit one due to owning high advancement performance ultimately.

Article Publication Details

This article is published in the [International Journal of Multidisciplinary Research and Bulletin](#), ISSN 3108-1428 (Online). In Volume 5 Issue 5 (Sep – Oct) 2026.
The journal is published and managed by [IRPG](#).

Acknowledgements

We sincerely thank the editors and the reviewers for their valuable suggestions on this paper.

Funding

This paper was supported by Korean Science & Engineering Fund (KSEF) at the granted No. 96-0300-11-01-03, under Specific Basis Research Program.

Data availability

No datasets were generated or analyzed during the current study.

Declarations

Ethics approval and consent to participate

The author(s) declare that it is not applicable.

Consent for publication

The author(s) declare that this is not applicable.

Competing interests

The author(s) declare that they have no competing interests.
