ABSTRACT

The created product and equipment made by a series of proceeding factories specially the electric vehicle would represent the latest technique where the key one batteries group is too big and heavy that may influence the car rotary-inertia make the car bigger force to drive. Another one will be the battery anti-coldness capacity in north area &winter knowing how cold it is below -20°C. Therefore, the low-temperature-performance may be searched more effortful and innovative for our cold regions driver to drive with non-default as for the battery in vehicle and motorcycles. The replacing charge may be more than 5 thousand yuan to a vehicle so expensive fee adding to a driver and his family. The motorcycle substituted fee may attain 1/10 above mentioned money for one totally. Still the lowering cost and high-efficiency research would be processed for the sake of enhancing quality by our scientist &senior engineers benefited to all of us. On the other side, the emerging high-technique knowledge and practice learned from college and manufacturer will wield its powerful strength in new one updating with new functions. Therein, the constant exhibiting new functions need to succeed and descend its validity within certain ie its longevity and zero-error in the course of usefulness in working occasions. So the essential fixing man is to be needed once there might be mistake happened in working period who can be educated by supplier engineer or manual written by the supplier side. So that independently completed one needs to be advocated and advertised by the maker side for the sake of cultivating more advancement technique in future with strategic planning. As we know that one improvement and updation will experience a difficult one from laboratory to manufacturer research &development department for designing the new one series of functions with strategic planning mind. Thereby, the precious one must be protected

from dealing randomly and even destroy its producing action making know more security tactic policies from government and makers side commonly and mutually.

1. INTRODUCTION

As an eminent high-technique like the vehicle developed status the current electric ones have outstanding role in developed manufacture-technique aspect because it has an important development opportunity like how we promote the key-technique batteries' information why to enhance the compositions with different elements combination upon a certain ratio from earth source and synthesis composition after processing them upon certain heat & cold procedures with many times ones. Moreover, the rapid transition will occupy current main positions to know how to exist in modern society the answer will be positive for long time specially in this transforming time from mechanical to automatic time. Hence, the battery technique will become future essential one for us to produce better performance ones that it may be an eminent anticipating research to process the duality-overlaps functions by our scientist & senior engineers. Subsequently, the special interdisciplinary subject will be created initiating formation to carefully study the cross-disciplinary one from now on. The automatic time is to attain how to deal with its actuality role in resolving the fringe-area like dynamics and controlling one combination that it can solve what to act and how to play a certain fields conception. Thereby, the new subjects describe what degree those innovations play will become a trending one in developed pace. So that there would require all of those relevant scientists and scholars to join to study the new subjects will afford strong force with anticipating many eyes. The more emphasis the talents and teachers learning-cooperation spiritual aspect to push those subjects into higher-level and height in solving the actuality problems met in front of us. Now it is only starting stage, it is also to be believed in future there would more and more scientist and scholars to join them realized their interesting studying and learning with more-practical-technology together for them grasp its relationship among those ones. For the sake of dedicating their wisdom to each sides the more efforts will be pushing those ones forwards sustainably and continuously special in the key aspect using combination and procedure whose effectiveness will be accepted by the evaluation constitution and groups after they published their achievement in famous journal. Definitely, those high-technique with low price from China is going to be prevalent in abroad market whose best benefit is the European market where the big sale tendency will be created upon experts

sentence in Tencent News. Furthermore, there will be some Chinese vehicle factories to set up for the sake of acquiring more profitable to turn-back like BYD in Hungary and SAIC in Spain & XPeng Motors etc. There would be another reason for oversee satisfying that is the good technique in China motors. Moreover, the China one will be upgraded rapidly due to our good technique capacities that makes Chinese vehicle get more welcoming. [1~23]

2. Discussions

The experts will accomplish their judgement in detailing GDP relevant value know how that affects our daily live for citizens like artificial intelligence payment robot that is completing the goods scanning and adding algorithm to be total price for customers to finish their face identification and presses the confirmation button, which is the entire course for one time dealing with. Those convenient payment machines are wielding their role in public occasion for us to share the immediately functional ones specially in occasions when there are many people to pay their capital. Maybe the robot price is somewhat high and often occurs mistake with fatigue chip one, hence the specialized people often go to working area to fix the machine making the cost highness for us to burden. Thereby, the simplified one just an identification-face i-pad with small size is using in city. [24~26]

2.1 Shengu Group net profit to parent & sale amount rate status' analysis

The Shengu group sale amount and net profit to parent rate status might indicate 4%~6% by 2023~H1 2026 accordingly in terms of Figure 1 to manifest the 2025 year relatively strongest profit rate with 7.3%. The net profit to parent value would attain 0.3%~0.7% by them respectively evidenced the 2025 year city mostly forward net profitable amount there.

Figure 1 Shengu Group sale amount and net profit to parent status. [1]

2.2 Zenodo publication amount status

The Zenodo publication number might show 28~13 ten thousand in 2020~2014 accordingly in light of Figure 2 to manifest specially in 2019 mostly forward publication numbers. Meantime, in 2018 the publication amount might attain 22 ten thousand evidenced its up-moderate occupation.

Figure 2 Zenodo publication amount status. [2]

The Zenodo publication number might show 9.9~5 thousand in 2013~2008 accordingly in light of Figure 3 to manifest specially in 2013 mostly forward publication numbers. Meantime, in 2012 the publication amount might attain 8.2 thousand evidenced its moderate occupation.

Figure 3 Zenodo publication amount status I. [2]

2.3 Scientist and Professor Qikun Xue awarded by Citation Laureates

On September 17, 2026 the Citation Laureates was issued that there would be 22 outstanding scientists to be awarded. Therein, the academician Qikun Xue in Chinese Academy of Science, president in Southern University of Science & Technology, professor in Tsinghua University was chosen into that name list depended on quantum abnormal Hall-effect experiment observation which was second time awarded to Chinese scientist to get that Citation-Laureates. [3]

2.4 Stocks price vibration

On September 18, the below stocks were recommended, they were <Huazheng Xincai> whose choice would be increasing 17% to stop profit, <Zhongshi Media> which completed anti-power to get the increasing limited. At the same time, the three internal ones would be cooperated with Huawei group which includes <Fule qing> got 213% in September, 2024, <Changshan Beiming> got 103% in September 2024, <Henghei Precise> got 57% in September 2025. at last, the two were also recommended in September 2024 like <Guanghong Tech>, <Guangku Tech> got their big wave stage separated from the entire industrial chain [4]

3. Conclusions

The papers published in high-citation journal will be contribution to inspiring the advancement readers for scientist & senior engineers to seek adoptive content in order to choose those which can make the one to build those waiting for developed another successful destination with inter-methods or multi-ones as an effortful result after the one finishes all the paper. From different papers the entire meaning is adopted for his destination to judge the correct experiment and calculation course evaluated the relevant paper adoption in that field and scope then transit the further course with adding more advancement methods to develop those published ones. Whatever the destination has differed from the original methods the continuously upgraded their research direction is to be possible if he definitely insists on his independently accomplishment. Don't change easily ones mind initially choosing route, then accelerating the speed to complete his initial direction with weaponizing his own aim for the sake of wielding adaptive papers course eventually for ones searching development. So as to update the calculative & Experimental modeling erection the relevant materials must be adopted with varying from different journal's article differently how degree the content is suitable for ones methods from ones exhibition specially from the public & college library. Therefore, the new-quality-productivity needs to foster deeply from current level between new interdisciplinary subjects for the sake of transferring variously knowledge and good experiences whose aim is able to realize the new-energy power and advancement technique derivation from the phenomenon and corresponding explanation modeling types. Many new technique enables to realize their subsequent research task continuously by our scientist and fellows in order to accomplish the transformation burden into reality product eventually.

Article Publication Details

This article is published in the [International Journal of Multidisciplinary Research and Bulletin](#), ISSN 3108-1428 (Online). In Volume 5 Issue 5 (Sep – Oct) 2026.

The journal is published and managed by [IRPG](#).

Acknowledgements

We sincerely thank the editors and the reviewers for their valuable suggestions on this paper.

Funding

The authors declare that no funding was received for this work.

Data availability

No datasets were generated or analyzed during the current study.

Declarations

Ethics approval and consent to participate

The author(s) declare that it is not applicable.

Consent for publication

The author(s) declare that this is not applicable.

Competing interests

The author(s) declare that they have no competing interests.
