ABSTRACT

One occupation will foster the future technology and application knowledge to survive in current and future destination know how to use those technique and experiences in adapting financial investment and some experiences. If the detailing work chances may give us to live more convenient and comfortable in defining countries no one would like leave there for the sake of acquiring more money due to managing key experience to work deepening in one direction eg. financial defined field for ou to purchase one IPO(initial public offering) maintaining many years anticipating to more capital and money can flow our wallets from a big technological company. Therein, after many years the stocks price would enhance so that the profitable capital might be enter our treasure for our family and units continuously to invest those ones specially to IPO. Thereby, the earning opportunities would come around our surrounds proceeding how they can be acquired in details and how many years may be attained after we invest capital to the one with mathematics method calculating the suitable value as processing a quantified method. Maybe, the many waiting for the number ie. earning money and from initiated investing transaction with how many capital to be entry with long-term item. Therein, the employment ratio is to be granted as an important factor to transform the technique immigration direction even to Europe &USA, Canada &Australia way for their more developed residents. Hence, the capital and technique one may create a innovation indicator-wind course how to immigrate into those developed countries become prevalent trend to our excellent experts and engineers etc many occupation aspects. So that only if those who grasps technique and minority capital the one is going to become true due to experiencing their roles in relevant fields with better achievement. So there will be many excellent ones leave China and go

those better ones for the sake of enhancing their wisdom there more smoothly. As we knew, the experimental conditions and salary is to become best in the world besides those low population density. Good employment presents good technique skill and experience, hence we should constantly improve our practical capacity adding theoretical support, those two will become eternal theme so as to get better live level quality & advancement.

1. INTRODUCTION

As an eminent high-technique like the vehicle developed status the current electric ones have outstanding role in developed manufacture-technique aspect because it has an important development opportunity like how we promote the key-technique batteries' information why to enhance the compositions with different elements combination upon a certain ratio from earth source and synthesis composition after processing them upon certain heat & cold procedures with many times ones. Moreover, the rapid transition will occupy current main positions to know how to exist in modern society the answer will be positive for long time specially in this transforming time from mechanical to automatic time. Hence, the battery technique will become future essential one for us to produce better performance ones that it may be an eminent anticipating research to process the duality-overlaps functions by our scientist & senior engineers. Subsequently, the special interdisciplinary subject will be created initiating formation to carefully study the cross-disciplinary one from now on. The automatic time is to attain how to deal with its actuality role in resolving the fringe-area like dynamics and controlling one combination that it can solve what to act and how to play a certain fields conception. Thereby, the new subjects describe what degree those innovations play will become a trending one in developed pace. So that there would require all of those relevant scientists and scholars to join to study the new subjects will afford strong force with anticipating many eyes. The more emphasis the talents and teachers learning-cooperation spiritual aspect to push those subjects into higher-level and height in solving the actuality problems met in front of us. Now it is only starting stage, it is also to be believed in future there would more and more scientist and scholars to join them realized their interesting studying and learning with more-practical-technology together for them grasp its relationship among those ones. For the sake of dedicating their wisdom to each sides the more efforts will be pushing those ones forwards sustainably and continuously special in the key aspect using combination and procedure whose effectiveness will be accepted by the evaluation constitution and groups after they published their achievement in famous journal. Definitely,

those high-technique with low price from China is going to be prevalent in abroad market whose best benefit is the European market where the big sale tendency will be created upon experts sentence in Tencent News. Furthermore, there will be some Chinese vehicle factories to set up for the sake of acquiring more profitable to turn-back like BYD in Hungary and SAIC in Spain &XPeng Motors etc. There would be another reason for oversee satisfying that is the good technique in China motors. Moreover, the China one will be upgraded rapidly due to our good technique capacities that makes Chinese vehicle get more welcoming. [1~19]

2. Discussions

The experts will accomplish their judgement in detailing GDP relevant value know how that affects our daily live for citizens like artificial intelligence payment robot that is completing the goods scanning and adding algorithm to be total price for customers to finish their face identification and presses the confirmation button, which is the entire course for one time dealing with. Those convenient payment machines are wielding their role in public occasion for us to share the immediately functional ones specially in occasions when there are many people to pay their capital. Maybe the robot price is somewhat high and often occurs mistake with fatigue chip one, hence the specialized people often go to working area to fix the machine making the cost highness for us to burden. Thereby, the simplified one just an identification-face i-pad with small size is using in city.

2.1 Chinese top big cities with ten million status

The Chinese top 9~16 big cities with ten million population might show 10.5 million ~13.2 million by Qingdao~Xian cities accordingly in 2025 manifested the Xian city bigger population trajectory to impact super cities. In contrast, the Zhengzhou & Suzhou cities became the second & third occupations to challenge the super cities with 13.1 million & 13 million accordingly.

Figure 1 Chinese top 9~16 big cities with ten million population. [1]

2.2 Chinese cities GDP with trillion yuan status analysis

The Chinese cities GDP with trillion yuan status analysis might show 750 billion yuan ~858 billion yuan by Yulin~Weifang cities accordingly in 2025 manifested the Weifang city potential economic trajectory to impact trillion yuan threshold. In contrast, the Nanchang & Yangzhou cities became the second & third occupations to challenge the trillion yuan threshold with 814 billion yuan & 750 billion yuan accordingly.

Figure 2 Chinese cities GDP with trillion status analysis. [2]

2.3 Introduction to the International Journal of Mathematics and Statistics Invention

As for Authors, we are calling for paper about September 2026 Issue with **Impact Factor 5.4**. **The IJMSI** is a peer reviewed International Journal which publishes papers online as well as print versions. IJMSI is indexed in major indexing like EBSCO HOST, CABELL's library, ULRICH web, Jour Info etc. The papers are invited for IJMSI Journal September 2026 Issue related to all fields of computer science and electronics etc. [2] So we are pleased to invite your submission to us contributed to both sides. We are about to publish your valuable paper after passing peer-reviews by experts immediately.

2.4 Introduction to the Let's Be mild coffee

The Let's Be mild coffee is a beverage made by Korean Lotte company whose composition includes as below in Table 1. [4]

Table 1. The nutrient of Nesacfe power.

Nutrients	per 175ml	NRV, %
Energy	238 KJ	3
Protein	1 g	2
Fat	0 g	0
Zero trans fat	0 g	-
Carbon-hydrate	13 g	4

Natrium	80 mg	4
---------	-------	---

Summarily, the product with advanced technique must be created in light of applying to senior engineers differed from old technique, so many updating ones continuously transiting to factory searched by scientists leading his team to finish one difficult project finally are making sure that new ones to release our front. Those innovative products might be applying to the requirement place only after the test sample is completed and approval by the responsible manager and engineer together to make a specification to deliver to customer side. That symbols one upgraded is to be completing its mission so how to continuously create the more latest ones will meet in front of us who must choose them from technique database prepared by scientist and engineers together in light of the strategic planning made upon senior scientist.

3. Conclusions

The papers published in high-citation journal will be contribution to inspiring the advancement readers for scientist & senior engineers to seek adoptive content in order to choose those which can make the one to build those waiting for developed another successful destination with inter-methods or multi-ones as an effortful result after the one finishes all the paper. From different papers the entire meaning is adopted for his destination to judge the correct experiment and calculation course evaluated the relevant paper adoption in that field and scope then transit the further course with adding more advancement methods to develop those published ones. Whatever the destination has differed from the original methods the continuously upgraded their research direction is to be possible if he definitely insists on his independently accomplishment. Don't change easily ones mind initially choosing route, then accelerating the speed to complete his initial direction with weaponizing his own aim for the sake of wielding adaptive papers course eventually for ones searching development. So as to update the calculative & Experimental modeling erection the relevant materials must be adopted with varying from different journal's article differently how degree the content is suitable for ones methods from ones exhibition specially from the public & college library. Therefore, the new-quality-productivity needs to foster deeply from current level between new interdisciplinary subjects for the sake of transferring variously knowledge and good experiences whose aim is able to realize the new-energy power and advancement technique derivation from the phenomenon and corresponding explanation modeling types. Many new technique enables to realize their subsequent research task continuously by our scientist and fellows in order to accomplish the transformation burden into reality product eventually. As to finishing the latest study results the engineer & scholars

must process the industrial learning and searching & usefulness for subsequent many technological capacity into factory designing department so as to complete the launch ones there. Definitely there would be many difficulties in front of us and it might be realized the successful products are about to exhibit our effortful results certainly.

Article Publication Details

This article is published in the [International Journal of Multidisciplinary Research and Bulletin](#), ISSN 3108-1428 (Online). In Volume 5 Issue 5 (Sep – Oct) 2026.
The journal is published and managed by [IRPG](#).

Acknowledgements

We sincerely thank the editors and the reviewers for their valuable suggestions on this paper.

Funding

This paper was supported by Korean Science & Engineering Fund (KSEF) at the granted No 96-0300-11-01-03, under Specific Basis Research Program.

Data availability

No datasets were generated or analyzed during the current study.

Declarations

Ethics approval and consent to participate

The author(s) declare that it is not applicable.

Consent for publication

The author(s) declare that this is not applicable.

Competing interests

The author(s) declare that they have no competing interests.
