ABSTRACT

The main pillar role equipment like vehicle battery technique is about to wield its important role in new machine like electric vehicle included HEV(hybrid electric vehicles) &EREV(extended range electric vehicle) and so many motorcycles in road for the sake of transiting freight ordered by buyer runs across street in urban and rural streets named “Kuaidi Xiaoge” whose task might be transiting detail goods ie. Instant food &drug etc. Daily-consumptive-substance. They will play the rapidly transporting destination so as to be comfortable and speedy to most our requirement indeed. No matter what weather it would be only if you buy the materials they can go and catch the commodity from cuisine store &supermarket and ride to the customer home immediately and directly that is really like a legend necessary youth. We should appreciate their urgent behavior contributed to modern society demand where we can meet those rapidly transiting action actively and positively. Therein, the more advancement and functions may be found and experimented by university laboratory and research &development department in maker upon sustainability and planning. Thereby, the industrial upgrading suitably needs to proceed by leader and engineers in university and maker known how the digitalization and renewable source can affect its role currently for some important makers where the artificial intelligence function devices will wield their strong

efficiency except for the substituting traditional carbon fuel &its contamination negatively. As for those old enterprise factories the urgently transforms behavior will be upgraded as soon as possible by common government and makers both sides, so that the new and strong ones might be pushed outsides gradually and primarily. Hence the newer factory management and structured regulation might change within decade to understand how to transform into the innovation and smart factory ultimately.

1. INTRODUCTION

As an eminent equipment like vehicle developed status current electric ones have outstanding role in developed manufacture-technique aspect because it has an important development opportunity like how we promote the key-technique batteries' information why to enhance the compositions with different elements combination upon a certain ratio from earth source and synthesis composition after processing them upon certain heat &cold procedures with many times ones. Moreover, the rapid transition will occupy current main positions to know how to exist in modern society the answer will be positive for long time specially in this transforming time from mechanical to automatic time. Hence, the battery technique will become future essential one for us to produce better performance ones that it may be an eminent anticipating research to process the duality-overlaps functions by our scientist &senior engineers. Subsequently, the special interdisciplinary subject will be created initiating formation to carefully study the cross-disciplinary one from now on. The automatic time is to attain how to deal with its actuality role in resolving the fringe-area like dynamics and controlling one combination that it can solve what to act and how to play a certain fields conception. Thereby, the new subjects describe what degree those innovations play will become a trending one in developed pace. So that there would require all of those relevant scientists and scholars to join to study the new subjects will afford strong force with anticipating many eyes. The more emphasis the talents and teachers learning-cooperation spiritual aspect to push those subjects into higher-level and height in solving the actuality problems met in front of us. Now it is only starting stage, it is also to be believed in future there would more and more scientist and scholars to join them realized their interesting studying and learning with more-practical-technology together for them grasp its relationship among those ones. For the sake of dedicating their wisdom to each sides the more efforts will be pushing those ones forwards sustainably and continuously special in the key aspect using combination and procedure whose effectiveness will be accepted by the evaluation

constitution and groups after they published their achievement in famous journal. Definitely, those high-technique with low price from China is going to be prevalent in abroad market whose best benefit is the European market where the big sale tendency will be created upon experts sentence in Tencent News. Furthermore, there will be some Chinese vehicle factories to set up for the sake of acquiring more profitable to turn-back like BYD in Hungary and SAIC in Spain &XPeng Motors etc. There would be another reason for oversee satisfying that is the good technique in China motors. Moreover, the China one will be upgraded rapidly due to our good technique capacities that makes Chinese vehicle get more welcoming. [1~22]

2. Discussions

The experts will accomplish their judgement in detailing GDP relevant value know how that affects our daily live for citizens like artificial intelligence payment robot that is completing the goods scanning and adding algorithm to be total price for customers to finish their face identification and presses the confirmation button, which is the entire course for one time dealing with. Those convenient payment machines are wielding their role in public occasion for us to share the immediately functional ones specially in occasions when there are many people to pay their capital. Maybe the robot price is somewhat high and often occurs mistake with fatigue chip one, hence the specialized people often go to working area to fix the machine making the cost highness for us to burden. Thereby, the simplified one just an identification-face i-pad with small size is using in city.

2.1 China total- retail-sales of consumer goods retail amount state

The China total retail sales of consumer goods status might indicate 21~19 billion yuan by Hubei~Shanghai city accordingly in 1985 in terms of Figure 1 to manifest the Hubei one relatively strong retail amount. The y-o-y growth value would attain 23%~25% by them respectively evidenced the Shanghai city forward retail amount there.

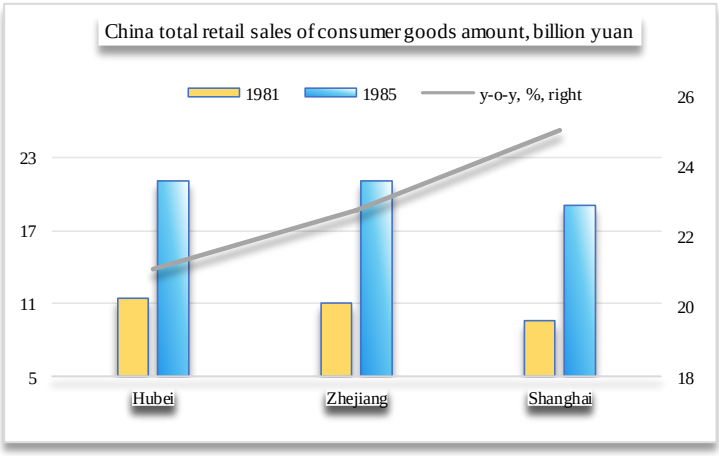

Figure 1 China total retail sales of consumer goods status. [1]

Furthermore, the China total retail sales of consumer goods status might indicate 18~21 billion yuan by Hunan~Hebei one accordingly in 1985 in terms of Figure 2 to manifest the Hebei one relatively strong retail amount. The y-o-y growth value would attain 16%~19% by them respectively evidenced the Hebei province forward retail amount there.

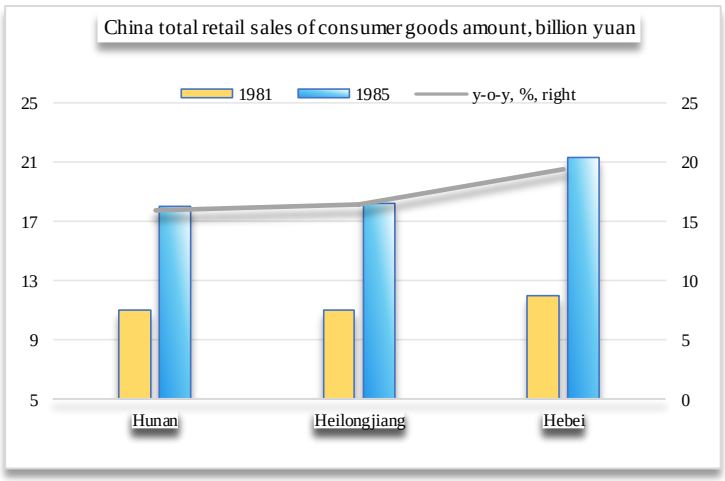

Figure 2 China total retail sales of consumer goods status. [1]

2.2 Shengu Group sale amount and net profit to parent analysis

The Shengu group sale and net profit to parent status might indicate 8.2~0.7 billion yuan by 2023~2025 accordingly in terms of Figure 3 to manifest the 2023 year relatively strong retail amount. The net profit to parent value would attain 0.3%~0.7% by them respectively evidenced the 2025 year city mostly forward net profitable amount there.

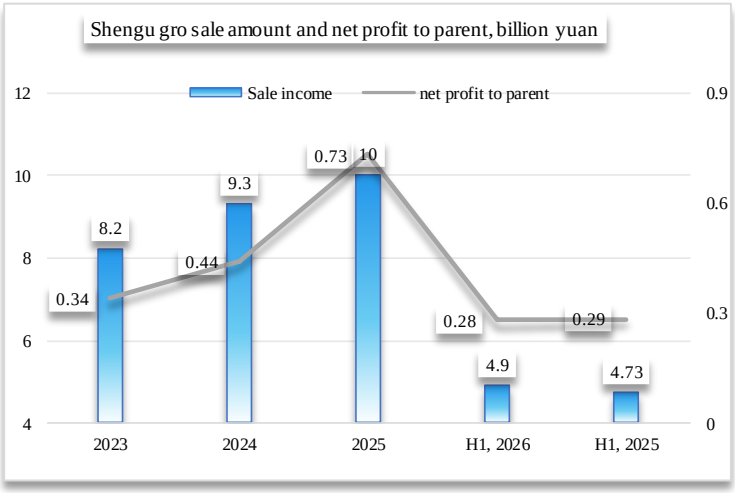

Figure 3 Shengu group sale and net profit to parent status. [2]

2.3 Introduction to the Nescafe coffee Rich-Pure-Latte×2 beverage

The Nescafe powder coffee rich-pure latte×2 as a rich-coffee beverage with 180ml is classified as Italy-style richness &pureness beverage. Its composition includes as like in Table 1. The coffeine content attains ≥400mg/Kg which is the two time of criteria in rich-coffee. It is suggested that one can may be drunk each day. The expiration date is 12 months.[3]

Table 1. The nutrient of Nesacfe coffe Rich-Pure-Latte×2 beverage

Nutrients	Content, per 100ml	NRV(nutrient reference value) %
Energy	173 KJ	2
Protein	1 g	2
Fat	1 g	2
Zero trans fat	0 g	-
Carbon-hydrate	7 g	2
Natrium	64 mg	3

2.4 Zenodo publication amount

The Zenodo publication number might show 130~12 ten thousand in 2026~2021 accordingly i light of Figure 4 to manifest in 2026 year forward publication numbers. Meantime, in 2025 &2024 the publication amount might attain 94 &66 ten thousand respectively evidenced their second &third position.

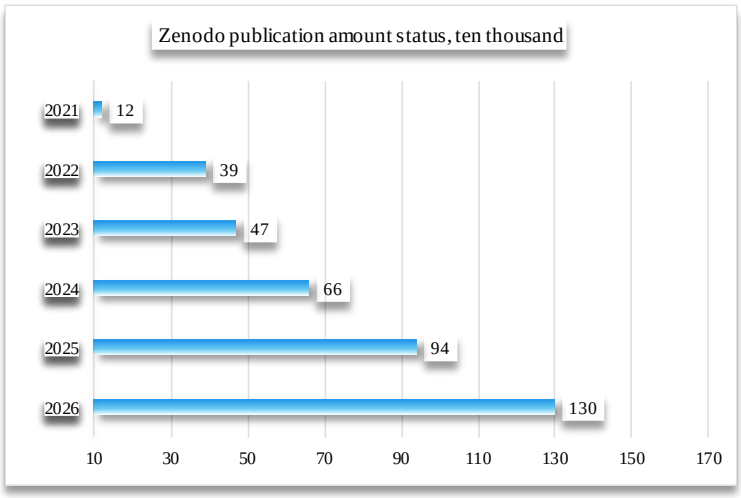

Figure 4 Zenodo publication number status. [4]

Summarily, the product with advanced technique must be created in light of applying to senior engineers differed from old technique, so many updating ones continuously transiting to factory searched by scientists leading his team to finish one difficult project finally are making sure that new ones to release our front. Those innovative products might be applying to the requirement place only after the test sample is completed and approval by the responsible manager and

engineer together to make a specification to deliver to customer side. That symbols one upgraded is to be completing its mission so how to continuously create the more latest ones will meet in front of us who must choose them from technique database prepared by scientist and engineers together in light of the strategic planning made upon senior scientist.

3. Conclusions

The papers published in high-citation journal will be contribution to inspiring the advancement readers for scientist &senior engineers to seek adoptive content in order to choose those which can make the one to build those waiting for developed another successful destination with inter-methods or multi-ones as an effortful result after the one finishes all the paper. From different papers the entire meaning is adopted for his destination to judge the correct experiment and calculation course evaluated the relevant paper adoption in that field and scope then transit the further course with adding more advancement methods to develop those published ones. Whatever the destination has differed from the original methods the continuously upgraded their research direction is to be possible if he definitely insists on his independently accomplishment. Don't change easily ones mind initially choosing route, then accelerating the speed to complete his initial direction with weaponizing his own aim for the sake of wielding adaptive papers course eventually for ones searching development. So as to update the calculative &Experimental modeling erection the relevant materials must be adopted with varying from different journal's article differently how degree the content is suitable for ones methods from ones exhibition specially from the public &college library. Therefore, the new-quality-productivity needs to foster deeply from current level between new interdisciplinary subjects for the sake of transferring variously knowledge and good experiences whose aim is able to realize the new-energy power and advancement technique derivation from the phenomenon and corresponding explanation modeling types. Many new technique enables to realize their subsequent research task continuously by our scientist and fellows in order to accomplish the transformation burden into reality product eventually. As to finishing the latest study results the engineer &scholars must process the industrial learning and searching &usefulness for subsequent many technological capacity into factory designing department so as to complete the launch ones there. Definitely there would be many difficulties in front of us and it might be realized the successful products are about to exhibit our effortful results certainly.

Article Publication Details

This article is published in the International Journal of Multidisciplinary Research and Bulletin, ISSN 3108-1428 (Online). In Volume 5 Issue 5 (Sep – Oct) 2026.
The journal is published and managed by IRPG.

Acknowledgements
We sincerely thank the editors and the reviewers for their valuable suggestions on this paper.

Funding
This paper was supported by Korean Science &Technology Fund(KSTF) at the granted number 96-0300-11-01-03, under the Specific Basis Research Program.

Data availability
No datasets were generated or analyzed during the current study.

Declarations

Ethics approval and consent to participate
The author(s) declare that it is not applicable.

Consent for publication
The author(s) declare that this is not applicable.

Competing interests
The author(s) declare that they have no competing interests.
