ABSTRACT

The high-subject multidisciplinary research and department will provide us many new work and search to do by why to search and write performance papers in the view of proceeding further mysterious research to Nano-scale one even photon with zero mass in our new materials and computer science at all which may afford a series of new dynamics unbalance to solve those complication physical phenomena through our scholars continuing process how to find and seek new intrinsic principles under surface performance virtual rules which may describe the key joint influence to the entire product. On the other hand, the high-technique might influence our human GDP indicator hugely from the primary industry to tertiary one whose role is beyond current traditional subject and item because they own the high-knowledge-composition in its inner for us continuously to search. So that through continually developed research the innovation performance would exhibit by scientist & authors for the sake of progressing to create subject like developing multidisciplinary one within various department in university and research &development department in manufacturer. Therefore, the new task would be produced continuously upon deeply cultivating new potential connect & knowledge from now on with scientists collaboration and independence behavior & judgement sustainably. On the other side, the auto as an important secondary industry has an exceptional role in one province and country so that it is to be underscored one in national GDP value where the more amount and quality needs to be granted. There would be so many ones made by Chinese main manufacturer specially in NEV(new energy vehicle) that is now very prevalent in society market included the domestic one and abroad one. So that the abroad market requirement is to enhance year after year that means there is more orders by them to be given us to produce those electric ones sustainably. Following that

international demands from various nations the new brands are to be urgently demanding and ascend its number from different models to different miles continuously. That the more many auto sells to abroad country means there may be more necessary provision from various provinces and cities makers frequently.

1. INTRODUCTION

The electrical generation would reflect the one region and country industry development level who plays an important role, so the multi-types electrical generating method like photovoltaic energy, wind turbine one and nuclear power plant. Thereby, we should consider the cost and efficiency relationship to make the advantage items to utilize in exploiting the green source which may bring out the innovation energy industry change in future. Meanwhile, the Robot and computer & AI (artificial intelligence) GPU can be applied to the newest robot and computer field to complete very sophisticated and humanoid structure which had realized the cutting-edge-field promotion continuously. In contrast, the journal will publish new papers on it online and offline to be convenient to us with Internet, so more reader can look at those papers which is a deep field to handle the defining destination in detail with experiment and model. Thereby, the relevant will identify the key content rapidly and judge its feasibility in making procedure with equipment after they discuss with the author for them to provide more detailing substantial proof. That is about to the industry, learn &research three factors in the transforming them into industry product, still there are many endeavors for us to judge the commercialization possibly like the materials cost, machine needs to be purchased, quality, its stability &efficiency. But there is still rapid procedure like purchasing the technique from the consult agency and supplier for the sake of quickness completion the former several stages to occupy the advantage power. So that the more scientist and experts would be necessary by now because they may promote our economy development level towards the developed countries which has a deep meaning. On the other side, the economy GDP (gross domestic product) y-y has an important value in statistics and economics in light of processing one nation general amount for hurrying to chase the former as early as possible. We should carry out the predict value by experts and government institution step by step for the sake of conquering the nations barrier. Then we have much rights to earn to export other countries and regions because we have enough space to encourage the export and

import foreign trade to make us to play No. One economy community on the whole. Let's fight and win the play. [1~10]

2. Discussions

The steel industrial system can be endured a heavy experience whether it can tolerate the more and more launch quantity year by year. At the same time, the excellent performance can endure to what time so the sustainable research and those steel materials can maintain what degree. Probably after ten years whether the advantageously technical reservation can change Chinese auto into the world auto market subsequently for us to bear and make an endeavour breaking through the international brands. At the same time, the NEV as an emerging business created from China BYD, Geely, Chery &Great Wall automobile etc. motor companies may take a lot of responsibility for booming the secondary industry developed task.

2.1 European &Asian nations GDP analysis

The European &Asian nations GDP analysis would offer 88 billion dollars ~8 billion dollars by China~Korea accordingly in 1969 in terms of Figure 1 to illustrate the former China strong economic momentum. The y-o-y growth value might attain 10%~31% by them respectively evidenced the Korea rapidest developed speed. In contrast, the Italy maintained the last occupation with the moderate -8% there.

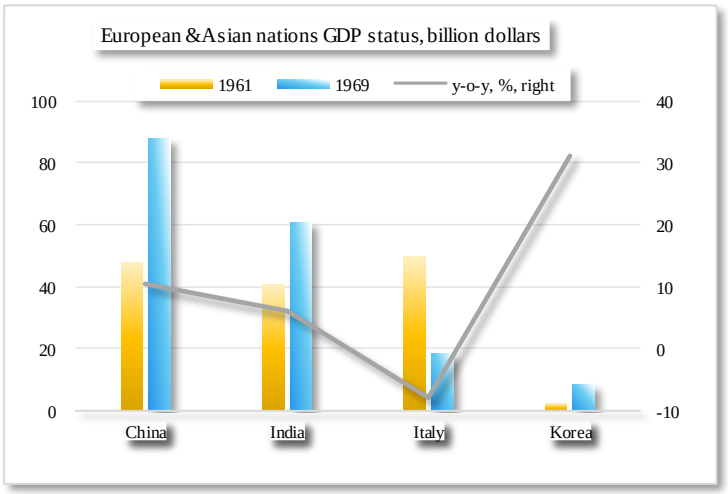

Figure 1 European &Asian nations GDP analysis. [1]

Moreover, the European &Asian nations GDP analysis would offer 185 billion dollars ~67 billion dollars by China~Korea accordingly in 1979 in terms of Figure 2 to illustrate the former China strong economic momentum. The y-o-y growth value might attain 17%~68% by them respectively evidenced the Korea rapidest developed speed. In contrast, the India maintained the moderate occupation with the 17% then.

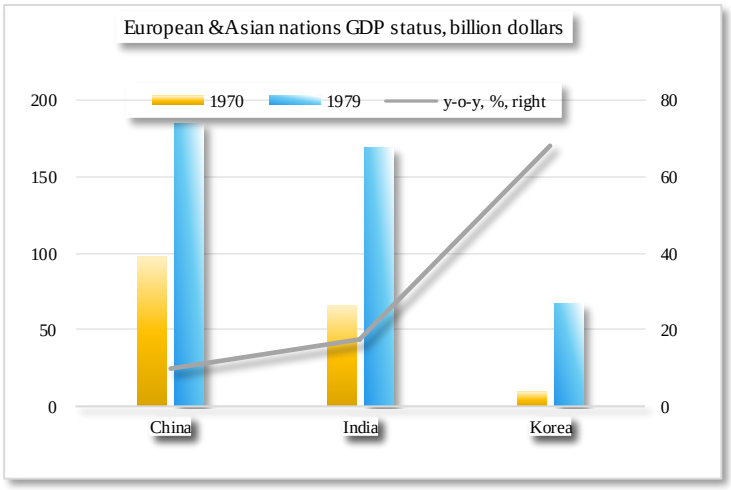

Figure 2 European &Asian nations GDP analysis I. [1]

Moreover, the European &Asian nations GDP analysis would offer 1,127 billion dollars ~437 billion dollars by Japan~Italy accordingly in 1979 in terms of Figure 3 to illustrate the former China strong economic momentum. The y-o-y growth value might attain 40%~28% by them respectively evidenced the Japan rapidest developed speed. In contrast, the France maintained the moderate occupation with the 33.5% then.

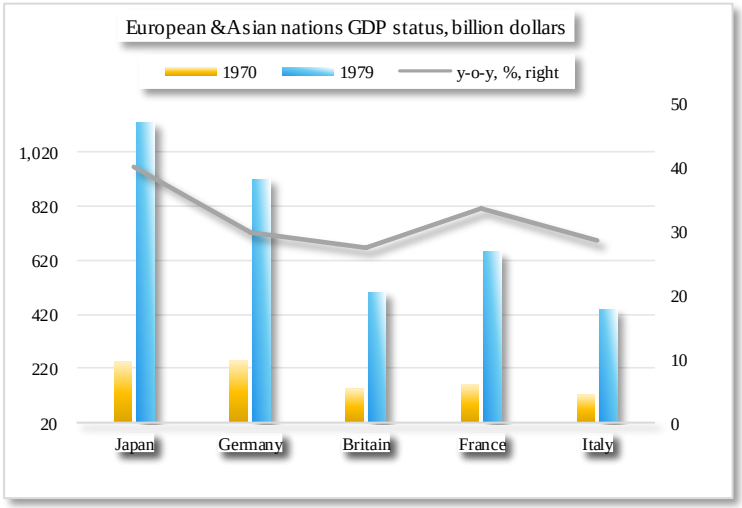

Figure 3 European &Asian nations GDP analysis II. [1]

2.2 Shenzhen &Asian four tigers GDP analysis

The European &Asian nations GDP analysis would offer 395 billion dollars ~140 billion dollars by Indonesia~Philippine accordingly in 2006 in terms of Figure 4 to illustrate the Indonesia strong economic momentum. The y-o-y growth value might attain 22%~9.5% by them respectively evidenced the Shenzhen rapidest developed speed with 30%. In contrast, the Thailand maintained the moderate occupation with the 13% then beyond Philippine.

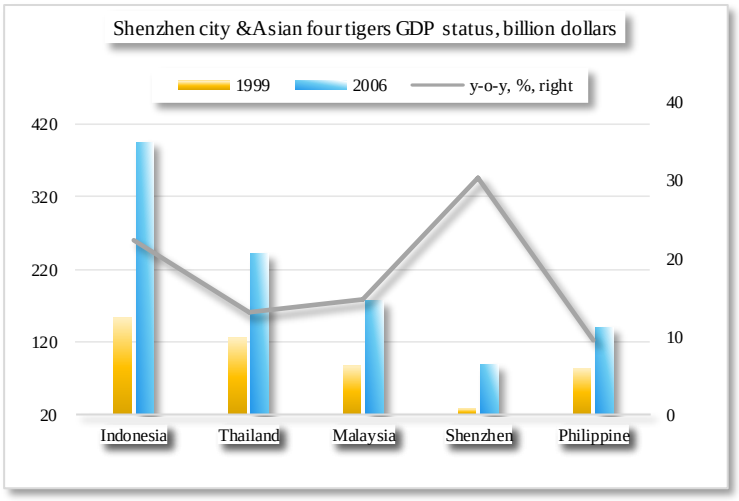

Figure 4 Shenzhen &Asian four tigers GDP analysis. [2]

Overall, the steel industrial system can be endured a heavy experience whether it can tolerate the more and more launch quantity year by year. At the same time, the excellent performance can endure to what time so the sustainable research and those steel materials can maintain what degree. Probably after ten years whether the advantageously technical reservation can change Chinese auto into the world auto market subsequently for us to bear and make an endeavour breaking through the international brands. On the other side, the more motor sold abroad the more benefit could be earned by us due to including the one system structures there for seller to buy advanced and upgraded one. The quality ones can present the dominating right to lead our motor enterprises go highly and heavily with a new-quality-productivity met in front of our progression path.

3. Conclusions

The high-subject multidisciplinary research and department will provide us many new work and search to do by why to search and write performance papers in the view of proceeding further mysterious research to Nano-scale one even photon with zero mass in our new materials and computer science at all which may afford a series of new dynamics unbalance to solve those complication physical phenomena through our scholars continuing process how to find and seek new intrinsic principles under surface performance virtual rules which may describe the key joint influence to the entire product. On the other hand, the high-technique might influence our human GDP indicator hugely from the primary industry to tertiary one whose role is beyond current traditional subject and item because they own the high-knowledge-composition in its inner for us continuously to search. So that through continually developed research the innovation performance would exhibit by scientist & authors for the sake of progressing to create subject

like developing multidisciplinary one within various department in university and research &development department in manufacturer. Therefore, the new task would be produced continuously upon deeply cultivating new potential connect & knowledge from now on with scientists collaboration and independence behavior & judgement sustainably. On the other side, the auto as an important secondary industry has an exceptional role in one province and country so that it is to be underscored one in national GDP value where the more amount and quality needs to be granted. There would be so many ones made by Chinese main manufacturer specially in NEV(new energy vehicle) that is now very prevalent in society market included the domestic one and abroad one. So that the abroad market requirement is to enhance year after year that means there is more orders by them to be given us to produce those electric ones sustainably. Following that international demands from various nations the new brands are to be urgently demanding and ascend its number from different models to different miles continuously. That the more many auto sells to abroad country means there may be more necessary provision from various provinces and cities makers frequently.

Article Publication Details
This article is published in the **International Journal of Multidisciplinary Research and Bulletin**, ISSN 3108-1428 (Online). In Volume 5 Issue 5 (Sep – Oct) 2026.
The journal is published and managed by **IRPG**.

Acknowledgements
We sincerely thank the editors and the reviewers for their valuable suggestions on this paper.

Funding
This paper was supported by Korean Scientist &Engineering Fund(KSEF) at granted No. 96-0300-11-01-03 under specific Basis Research Program.

Data availability
No datasets were generated or analyzed during the current study.

Declarations
Ethics approval and consent to participate
The author(s) declare that it is not applicable.

Consent for publication
The author(s) declare that this is not applicable.

Competing interests
The author(s) declare that they have no competing interests.
